

De-icing agent ProFil Pro mixture - 200 L

Item number E4267-01

Material and weight

Weight: approx. 220 kg

Function

ProFil Pro is a special agent for the preventive protection of the contact wire against frost and ice. The agent forms an impregnation film (protective layer) on the contact wire. This protective layer prevents water from binding directly to the contact wire and thus prevents ice from forming on the contact wire. It also helps to

loosen existing ice.

ProFil Pro is 100% biodegradable and therefore environmentally friendly and therefore no dangerous goods.

Specification

Mix ratio: 40% ProFil Pro, 60% demineralized water

Temperatur range: to approx. -23°C (=freezing point)
