Pump and control unit of PROFIL 1500V (US/CA)

Item number B1572-02

Dimensions

Width: 750 mmDepth: 600 mmHeight: 1000 mm

Material and weight

• Weight (empty): 140 kg

Applicable standards

• Maschinenrichtlinie 2006/42/EG

• UL 508A

Function

The pump and control unit of the PROFIL 1500V is the heart of the system. It contains an integrated de-icing tank with level sensors, all hydraulic components for the pressure build-up and their control and monitoring as well as the electrical switching of all components.

Specification

• Tank volumen: ~135 Liter

 Pressure: max. 10 bar (adjustable to regulate the spray rate)

 Power supply: mains voltage 120 V AC and/or battery 24 V DC

• Connections:

- mains plug
- earth conneciton
- electrical connection for spray unit
- hydraulic connection for spray unit
- hydraulic connection for external tank
