

Spray unit of PROFIL 1500V

Item number B1575-01

Dimensions

- Width: 1100 mm
- Depth: 75 mm
- Height: 75 mm

Material and weight

- Weight (empty): ~4 kg

Applicable standards

- Maschinenrichtlinie 2006/42/EG
- EN 50124-1:2001
- IEC 60060-1

Function

The spray unit of the PROFIL 1500V is installed

directly on the existing pantograph. The contact wire sensor is used to determine the exact position of the contact wire in order to control the seven nozzle valves with this information. This functional principle enables an effective and economical treatment of the contact wire with the de-icing agent.

Specification

- Pressure: max. 15 bar
- Connections:
 - electrical connection for pump and control unit
 - hydraulic connection for pump and control unit
