FSK SIMULATOR

DIMENSIONS

length: 90mm
width: 150mm
depth: 25mm

MATERIAL AND WEIGHT

material: ABS
weight: 0.200kg

FUNCTION

With the FSK simulator it is possible to simulate a vehicle as to test the inductive antenna. With a double-click the transmission canal is put on hold for 1 min. 3 threads allow the installation of the device to a stick as to test the antenna on the contact wire. It is a battery powered handily portable unit. Easy handling.

SPECIFICATIONS

operation voltage: alkali block battery
range of temperature: Service -20°C to +60°C
level of protection: IP42

COMMENTS

- battery life: 10h
- safety relevant: no
- uv-resistant: yes
- frequency accuracy: <0.1%
- distortion factor: < 10%
- Accessories: case
